Re: A Brides Dream Folders

When I begin talking with the staff regarding A Bride's Dream folders, I was not sure they would look like the ones from the website. Well, they look even better! I cannot get over how great they look, so professional for my customers and the fact that vendors are located on the folders gives our Bride an instant resource to call for her wedding planning - thus reducing her stress during this busy time.

I would love to have an additional 300 folders to pass out to the Brides who will attend our bridal show on March 29, 2025. When we hand out these folders to the Brides I am sure these Brides will understand how important it is to come to A Brides Dream and be able to have so many resources so instantly available.

I would encourage any business to participate in this program! I know your business is going to accomplish a rewarding task such as we have a A Bride's Dream. We know this folder will fit into our mission statement, an that is to provide a cost-effective vision when planning their weddings with the many vendors participating in the folder advertising! If any business manager would like to talk to me, call Bridal Folders and the will be glad to have me talk to your about our wonderful experience we had during the set up of A Bride's Dream folders!

Again, our staff loves the folders and look forward to implementing them into our daily business routine as well as during bridal shows that we will be participating in the future.
